## PREPAREDNESS

ANTHRAX SCENARIO- participated assisted in hosting a two-day national workgroup meeting in the regional office discussing the initial, response and remediation phase of a terrorist attack.

NIMS INTEGRATION TEAM - highlighted pertinent topics from the recent national I meeting for management review. And worked with national coordinator, R. Runge, on incorporating changes on the ICS 210.

## RESPONSE

WESTBANK ASBESTOS - worked on preparing a map representing the general areas of properties excavated during the removal action. Had to sort through old data base files to compile a list of addresses for GIS to map. This map was prepared in response to a request by the RP in final settlement negotiations. And response to a FOIA request, sorted through electronic files to compile copies of a resident's property.

HURRICANES GUSTAV and IKE - discussed project close-out with the current IC, W. Zehner, and began organizing a meeting between LDEQ and our management to discuss Lessons Learned.
